

Trasteel ELITE

Innovation, Design, Technology and Efficiency are the four main features that define **Trasteel Elite**.

Trasteel Designs ELITE

• Optimised Elite designs.

EXCAVATOR TEETH

PENETRACIÓN ELITE P
High penetration tooth for general purposes

HEAVY DUTY ELITE PHD
Tooth with extra wear material for heavy duty applications

TIGER ELITE V
Highly penetrating symmetrical tooth

TWIN ELITE TU
Highly penetrating double tipped tooth

EXCAVATOR AND LOADER ADAPTERS

SOLID ADAPTERS WITH WEAR CAPS

Reinforced solid adapters designed to avoid breakages under highly severe working conditions

BUCKET PROTECTION

SIDEBAR AND LIP PROTECTORS AND WELD-ON HEEL SHROUDS

INTEGRAL PROTECTION

Adaptable for most anchoring systems on the market

LOADER TEETH

LOADER ELITE L
Tooth for general purposes with loose materials

LOADER HEAVY DUTY ELITE LHD
Reinforced tooth for loading highly abrasive material and rocks

BACKHOE TEETH

TOP PIN ELITE L
Tooth for general purposes

BOLT-ON ELITE L
Bolt-on tooth for general purposes

RIPPER TEETH

RIPPER SM TOOTH
Highly reinforced and self-sharpening ripper tooth

Other manufacturer's names, descriptions, pictures and part numbers are used for reference purposes only.

Trasteel BLADES

Cutting edges and end bits

Trasteel Blades offers a full range of blades, end bits and wear plates produced with special steel up to 500 HB hardness, providing superior durability in any terrain.

- Grader blades
- Dozer blades and corner guards
- (Wheel Tractor-) Scrapers blades
- Cutting edges for manufacturing and repairing buckets
- Loader blades

Half-arrow Blades

Special loader half-arrow blades produced with cast steel up to 540HB hardness.

These blades have a substantially increased useful life compared to traditional reversible blades, resulting in significant maintenance savings.

Trasteel TOOLS

Trasteel Tools offers two full lines of tools for demolition and milling.

Demolition Bits

Manufactured under the most rigorous and demanding quality controls standards implemented in all **Trasteel Wear Parts**, delivering excellent results.

Milling Bits

Trasteel Wear Parts offers a full line of milling bits for different hard materials such as rocks, concrete and asphalt, all of them providing an exceptional performance. Our range covers shaft diameters from 10 m/m to 30/38 m/m and includes different lengths and diameters for the tungsten carbide tip.
