

A close-up photograph of several excavator buckets, showing significant wear and tear. The buckets are dark blue or black, with large areas of the surface material missing, revealing a lighter, sandy or brownish material underneath. The buckets are arranged in a row, pointing downwards. The background is a blurred, light-colored, rocky or sandy terrain.

Trasteel WEAR PARTS

**Wear
Parts**

Trasteel Wear Parts is a global benchmark in spare parts for the machinery employed in public works, construction and mining. Since its inception, this brand has aimed at providing an excellent final product.

To this end, a great deal of attention has been paid to all aspects, starting from the design to the selection of raw materials and production processes. This is what defines **Trasteel Wear Parts**.

The primary objective of this global brand is to combine design and technology to offer a maximum profitability in the field.

WEAR PROTECTION COMPONENTS

Our range compiles a huge variety of anti-wear protection elements for all kind of machinery, from excavators, loaders, bulldozers, motor-graders, scrapers and also tools for hydraulic hammers, etc.

Steel
Performance

Trasteel ELITE

With over 25 years' experience behind us, we propose at an exigent market Trasteel Elite, a full line of teeth and wear components. Our technical department has innovated, developing exclusive designs that provide extra wear material where necessary, extending the life of our teeth.

In addition to offering greater durability, thanks to an innovative design and technologically advanced production processes, our teeth enhance productivity and efficiency levels by increasing performance regardless of the work at hand or the terrain.

Innovation, design, technology and performance are the four main features that define **Trasteel Elite**.

Trasteel Elite is known for its innovative designs that deliver productivity and profitability.

Design

Our designs provide with the maximum amount of wear material where the tooth needs it most but maintaining optimum penetration to ensure highest productivity.

Well coupling Teeth / Adapters

Care is taken to ensure that the fitment between the tooth and its adapter is indefectible to maintain the correct working angles and avoid unnecessary breakages and stoppages.

Raw Material and Chemical Composition

We consider that using the best steels for casting and providing all the chemical elements (chromium, nickel, etc.) in a sufficient and balanced proportion is crucial.

Production Processes

Every single step in production is essential, and so we follow them strictly:

casting + normalising +
heat treatment +
quenching + tempering.

Heat Treatment

Heat treatment is a fundamental aspect in the manufacture of wear material, so much so, that it determines the quality, performance, toughness and hardness of all our teeth and protective elements.

Image of quality

The aesthetics of a product is decisive once placing it on the market. Attaining an attractive and good quality image is our goal as well.

Trasteel ELITE

Trasteel Elite offers a wide range of tooth options and profiles, adapters and wear protections for excavators and loaders, bulldozers, etc.

EXCAVATOR TEETH

Trasteel
ELITE

ELITE P Penetration

High penetration tooth for general use, with more material and higher productivity. Optimised **ELITE** design.

Trasteel
ELITE

Penetration HEAVY DUTY ELITE PHD

Tooth with extra wear material for Heavy Duty applications, excellent penetration and self-sharpening features. Optimised **ELITE** design.

Trasteel
ELITE

Tiger ELITE V

Highly penetrating symmetrical tooth for extremely compact grounds. Optimised **ELITE** design.

Trasteel
ELITE

Twin ELITE TU

Double tipped highly penetrating tooth for extremely compact ground. Optimised **ELITE** design.

LOADER TEETH

.Trasteel
ELITE

LOADER ELITE L

Tooth for general purposes on loaders for light and loose material. Optimised **ELITE** design.

.Trasteel
ELITE

LOADER HEAVY DUTY ELITE LHD

Reinforced tooth for loading highly abrasive material and rocks. Optimised **ELITE** design.

BACKHOE TEETH

.Trasteel
ELITE

TOP PIN ELITE L

Tooth for general purposes with longer service life. Optimised **ELITE** design.

.Trasteel
ELITE

BOLT-ON ELITE L

Bolt-on tooth for general purposes with extra wear material. Optimised **ELITE** design.

RIPPER TEETH

RIPPER SM TOOTH

Super reinforced RIPPER TEETH for heavy duty applications and self-sharpening profile. Optimised **ELITE** design.

.Trasteel
ELITE

EXCAVATOR AND LOADER ADAPTERS

ADAPTERS WITH WEAR CAP SOLID ADAPTERS

We design reinforced and solid adapters to avoid breakages when subjected to very severe working conditions.

Optimised **ELITE** designs.

Trasteel
ELITE

BUCKET PROTECTION

SIDE BAR PROTECTORS, WELD-ON LIP AND HEEL SHROUDS PROTECTORS

COMPLETE PROTECTION

We also offer our customers a wide range of anti-wear protections to cover and reinforce the most sensitive areas of the bucket, protecting it against damage and premature wearing.

Optimised **ELITE** designs.

Trasteel ELITE

Adaptable for most
of the systems
on the market

TSJ (CAT)

TSV (SUPER V)

TSK (KOMATSU)

JCB

DOOSAN

H&L

HYUNDAI

Trasteel Commodity

Trasteel Commodity offers a range of teeth and adapters under top standard designs made of the leading alloys, ensuring productivity and profitability.

Trasteel Commodity is also available for most systems on the market: Caterpillar, Komatsu, JCB, Liebherr, etc.

Other Trasteel elements

BI-METAL Protections

We are continually innovating and enhancing our range of protections to meet the needs of our customers. Prolonging the useful life of your equipment with our bi-metal protections.

Accessories

Trasteel Wear Parts also offers the full range of hardware, fasteners and locking systems for teeth and wear elements, and plow bolts for blades.

Features of our Trasteel Wear Parts steels

Trasteel Steels composition

We conduct continuous analyses of the chemical composition of our steels and take care of all the elements of the alloy to guarantee quality.

Carbon, chromium and nickel stand out on our steel due to their inherent properties.

Our steels contain hardly any impurities, as shown by the values of S (Sulphur) and P (Phosphorus), achieved in optical spectrometry tests.

Trasteel Steels specifications

Trasteel has different specifications in its casting steels to achieve adequate ductility and wear resistance in each of the parts.

Types	Trasteel steels	Use	Hardness (HRC)	Hardness (HB)	Impact values (J)
Teeth < 12 Kg	TST10 TST30	Construction teeth	47-53	450-533	>18J/20J
Teeth > 12-25 Kg	TST20	Teeth for heavy construction	47-53	450-533	> 22J
Teeth > 30 Kg	TST40	Mining teeth	47-53	450-533	> 25J
Adapters < 30 Kg	TSA10 TSA20	Construction adapters	27/37	266-352	> 28J
Adapters 30-45 Kg	TSA30	Adapters for heavy construction	33-42	306-401	> 30J
Adapters > 45 Kg	TSA50	Adapters for heavy construction/Mining and quarrying	33-42	306-401	> 32J
Adapters > 70 Kg	TSA60	Mining and quarrying adapters	33-42	306-401	> 35J
Weldable bucket protectors	TSP120 TSP130 TSP150	Weldable bucket protectors	40-46	365-436	>20J/23J

Hardness and Resilience

The study of alloys shows that Trasteel steels exceed expectations in hardness and toughness.

Quality is one of our fundamental pillars and to prove this, we carry out external hardness and resilience controls in laboratories certified by ENAC (National Accreditation Entity).

In the reports, our customers can see the homogeneity of our products, which obtain Vickers hardness between 566-577 HV (whose equivalent in Brinell hardness, tested with Tungsten carbide, is 532-543 HB). The resilience achieved in our laboratory tests also indicates that we use hard and tenacious steels, leading to greater absorption of energy by impact.

The hardness lines where the measurements have been made are indicated below:

Hardness point N°	1 (HB)	2 (HB)	3 (HB)	4 (HB)
Line I. Hardness value	577 (543)	566 (531)	567 (532)	569 (534)
Line II. Hardness value	577 (543)	569 (534)	571 (536)	569 (534)
Line III. Hardness value	571 (536)	576 (542)	569 (534)	566 (531)

ENAC-certified tests

Conducted in external laboratories

BLADES

**Blades and
Cutting Edges**

.Trasteel BLADES

Trasteel Blades is the result of vast experience in designing, development and marketing of all types of spare parts and ground engaging tools for machinery.

We are talking about specialists with more than 25 years of constant innovation, which has led to the creation of **Trasteel Blades**, a leading brand that offers their customers exceptional performance in the field.

In this sense, and always willing to respond to a great variety of **Trasteel Blades** offers a range of blades with an outstanding quality that will provide with an optimal response to the most demanding projects.

Penetration
Toughness
Hardness

Available for
all major brands:
**CATERPILLAR, KOMATSU,
VOLVO, JOHN DEERE, CASE**

Cutting edges, blades and end bits for bulldozers, motor graders, loaders, scrapers, etc.

We have performed several analyses to verify the mechanical capabilities of our steels in external laboratories certified by ENAC (National Accreditation Entity). Most of our tests exceed our specifications.

Trasteel steels	Use	Hardness (HRC)	Hardness (HB)	Impact values (J)
TSB50	Cutting tool and construction blades	46-52	445-514	> 24J
TSB40	Cutting Tool and construction lades	36-43	345-430	> 24J
TSC80	Levelling Blades	25-32	255-302	> 18J

All our suppliers manufacture
under the ISO 9001 Standard

End bits and blades for bulldozers and scrapers

- Blades with STD, HD and extra HD thickness
- Tungsten Carbide impregnated blades
- Cast blades for Bulldozers
- Different versions of End Bits:
 - Flat/Curve hot cupped
 - Heavy Duty and Extra Heavy Duty

- Cast End Bits
- One piece Ripper shanks
- Scraper routers

Loader and excavator blades

Trasteel Blades offers a wide range of loader blades and protections:

- Base blades
- Bolt-on blades
- Segments
 - HALF ARROW blades
 - Weld-on side protectors
 - Bucket plates protectors

Motor grader blades

- Boron steel heat treated grader blades: display a very high resistance to impact and wear under very demanding working conditions
- High Carbon steel grader blades: the best choice for cost-efficiency in general working conditions
- End bits and overlays: essential for the good performance of the machine
- Serrated graders blades for compact and frozen ground

.Trasteel
TOOLS

**Hydraulic
Hammer
Tools**

Trasteel TOOLS

Trasteel Tools offers our customers two lines of tools for demolition and milling:

- Tools for Hydraulic Hammers
- Milling bits

Both are manufactured with rigorous and demanding quality controls common to all **Trasteel Wear Parts**, delivering excellent results.

Demolition and milling tools
following Trasteel Wear Parts
quality standards

	Model	Types	Uses
P		Conical	Breakage of low-abrasive or loose soils made up of homogeneous material
S		Chisel	Breakage of asphalt and concrete
D		Blunt	Breakage of massive rocks
E		Pyramidal	Demolition of concrete and compact materials

Milling bits **.Trasteel** TOOLS

The **Trasteel Tools** Bits follow and meet all our own quality requirements. We offer a full bits range for different works as milling for rock, concrete and asphalt with exceptional performance on all of them.

Our range of cutting tools covers diameters from 10 m/m to 30/38 m/m., each applying different lengths and diameters on Tungsten Carbide tip.
